QUALITY AND ENVIRONMENTAL LABELLING

MATERIAL CONTENT

| Wood | 41,2 kg | 94 % |
|---------|---------|-------|
| Steel | 1,3 kg | 3 % |
| Plastic | 0,5 kg | 1 % |
| Glue | 0,2 kg | 1 % |
| Zinc | 0,3 kg | 1 % |
| Total | 43,6 kg | 100 % |

Disclaimer: Material content is based on Capacity LC4M1000D02BAW12.

RECYCLED MATERIAL

| Post-consumer recycled content | 8,5 kg | 20 % |
|--------------------------------|---------|------|
| Pre-consumer recycled content | 20,6 kg | 47 % |
| Total recycled content | 29,1 kg | 67 % |

RECYCLABILITY

| Material recycling | 6 % |
|---------------------|-------|
| Energy recovery | 94 % |
| Total recyclability | 100 % |

Disclaimer: The recycled content is based on Capacity LC4M1000D02BAW12. Numbers may vary based on model and options selected.

TOTAL CO₂

FULFILLED TECHNICAL STANDARDS

- EN 16121:2013+A1:2018 L1 Requirements for safety, strength, durability and stability
- EN 16122:2012+AC:2015 Test methods for the determination of strength, durability and stability
- EN 14073-2 safety requirements
- EN 14073 Test methods for the determination of stability and strength of the structure
- EN 14074 Test methods for determination of strength and durability of moving parts

CHEMICAL DATA

The product does not contain:

| Substances on REACH candidate list of SVHC's above 0,1 % w/w |
|--|
| Substances on Living Building Challenge Red List |
| Asbestos |
| Heavy metals |
| Phthalates |
| Brominated or halogenated flame retardants |
| PVC |
| Hexavalent chromium |
| Biocides |

RECYCLING

| ID | Material | Tools for disassembly | Waste fraction |
|------|------------------|-----------------------------|-----------------------------|
| 1, 2 | Wood, ABS | Screwdriver | Combustible waste |
| 3, 5 | PUR-foam | Knife/Scissors | Combustible waste |
| 4, 6 | Wood | Screwdriver, Knife/scissors | Combustible waste |
| 8 | PUR-foam, fabric | Knife/Scissors | Combustible waste |
| 9 | Wood | Screwdriver, Knife/scissors | Combustible waste |
| 10 | Velcro | Knife/scissors | Combustible waste |
| 25 | Wood, steel | Screwdriver | Combustible waste/ Steel |

*Always consider reusing or repurposing this product before recycling its components.

LEED CONTRIBUTION

The product can contribute to the earning of points within the following credits.

LEED V 4

Interior Design and Construction

| MR Credit: Interiors life-cycle impact reduction | Kinnarps offers services for recycling, refreshing or reusing products. Share of recyclable material in the product: 6 % |
|--|--|
| MR Credit: building product | Recycled content: Post-consumer 20 %, |
| disclosure and optimization | Pre-consumer 47 % |
| – sourcing of raw materials | Manufactured in Kinnarp, Sweden |

Building Design and Construction

| MR Credit: building product | Recycled content: Post-consumer 20 %, |
|---|--|
| disclosure and optimization | Pre-consumer 47 % |
| – sourcing of raw materials | Manufactured in Kinnarp, Sweden |
| MR Credit: furniture and medical furnishings (healthcare) | The product contains no or less than 100ppm hexavalent chromium, heavy metals, PFCs or PFOA, or added anti-microbial treatments. Recycled content: Post-consumer 20 %, Pre-consumer 47 % |

Building Operations and Maintenance

| MR Credit: purchasing— facility maintenance and renovation | e product does not contain any substances on ACH Authorization or Candidate list. |
|--|--|
|--|--|

WELL 2 CONTRIBUTION

The product can contribute to preconditions or the earning of points within the following features.

Preconditions

| V02 Ergonomic Workstation Design | Part 5: Instructions on how to make adjustments to achieve the intended benefits of the product are provided through user manuals. |
|-------------------------------------|--|
|-------------------------------------|--|

Optimizations

| X05 Enhanced Material | uct is free from halogenated flame |
|-----------------------|--|
| Restrictions | s, per- and polyfluoroalkyl substances |
| (PFAS), le | ead, cadmium and mercury. |

PACKAGING AND TRANSPORT

The product is shipped with blankets and cardboard sheets as packaging material that is returned to the factories after delivery and reused. This method saves 270 kg of packaging material per container and enables 50% more products to be transported in each truck. Kinnarps' trucks have a load efficiency of approximately 87% and are run on diesel with renewable content that reduces CO_2 emissions.

MATERIALS

- Fabrics: All of Kinnarps' standard fabrics are free from flame retardants and azo dyes. Kinnarps can also offer multiple fabrics labelled with or fulfilling the requirements of EU Ecolabel and/or Oeko-Tex.
- Wood: We use FSC® and PEFC-certified wood material in the production of our products. The origin and legality of all wood material is controlled and assessed in accordance with Kinnarps Timber Trading Policy. All wood boards fulfil high requirements regarding formaldehyde in accordance with TSCA Title VI or half E1.
- Metal finishing: Kinnarps use powder coating for surface treatment of metal which gives very low emissions of volatile organic compounds (VOC). For chrome executions, only trivalent chrome is used.
- Wood finishing: Kinnarps treats the surface of veneered tables and storage with water based UV-lacquer which ensures very low application quantities of volatile organic compounds (VOC).
- Plastic: Plastic components that are used in products produced by Kinnarps are free from PVC and flame retardants, with the exception of some plastic parts of electrical components. The plastic is also free from PFOS, Bisphenol A and phthalates. Plastic components over 100 g are labelled according to ISO 11469.
- Padding: The padding in our task chairs is manufactured in Kinnarps' factory in Skillingaryd, Sweden, which enables us to have control over the whole process and ensure a safe production. The padding used in other products is certified with Oeko-Tex. All padding used in Kinnarps' products are free from flame-retardants and azo dyes.
- Electronics: Electronic components are CE-labelled and comply with the EU RoHS directive. This prohibits the use of lead, mercury, cadmium and hexavalent chromium, as well as the flame-retardants PDD and PBDE, in electronic products. Conflict minerals are not allowed in the components.
- Separability: Separability is taken into consideration in the product development process to facilitate the recycling of material when the products can no longer be used. Different types of material are not cast together in a way that makes it hard to recycle. Products are designed with replaceable parts that are easy to change.
